

Fire Risk Assessment - Food Concessions

This signed and completed form must be maintained available for inspection by the Fire & Rescue Service/ Event Organiser/ Council Officers at all times. Please retain for your records. A copy does not need to be sent to CFOA.

	e of Unit / Stall			
Cont	act No. on site			
Location on site				
	In order to comply with the Regulatory Reform (Fire Safety) Order 20 you MUST complete a Fire Risk Assessment of your stall or unit. The Risk Assessment needs to identify the fire hazards and persons at you must endevour to remove or reduce these risks.	risk,		
F	Failure to comply with this requirement will result in you being removed from You must be able to answer YES to the following questions.	m the s	ite.	
You	You <u>must</u> undertake a Fire Risk Assessment for your unit, which must be suitab circumstances. do not need to use this form, and may use another method if you wish, howeve onsidered to be suitable for most standard food units where customers do not er	r, this fo	rm is	
1.	Do you have an inspection / gas safety certificate for the appliances and pipe work? (copy to be available for inspection)	Yes	No	
2.	Are cooking appliances fixed securely on a firm non-combustible heat insulating base and surrounded by shields of similar material on three sides?	Yes	No	
3.	Are the shields providing an adequate and effective barrier of at least 600 mm between the heat source and any combustible material?	Yes	No	
4.	Have you taken care to ensure that no combustible materials can be blown against, or fall onto the apparatus?	Yes	No	
4.5.	· ·	Yes		
	against, or fall onto the apparatus? Are the LPG cylinders kept outside, or within a specific ventilated unit,		No	

9. Do you ensure that gas supplied is isolated at the cylinder, as well as the appliance when the apparatus is not in use and appliances are fitted with full flame safety devices on all burners that are not readily visible? 10. Do you ensure replacement cylinders are fitted in the open air away from the sources of ignition? 11. Is a member of staff appropriately trained in the safe use of LPG present in the unit at all times? 12. Are the structure, roofing, walls and fittings of your stall or unit flame retardant? (Certificates may be required) 13. Where necessary, are there sufficient directional signs indicating the appropriate escape route and do they comply with current regulations? 14. Are the exits maintained available, unobstructed, and unlocked at all times the unit is in use. 15. If you intend to trade during the hours of darkness, do you have sufficient lighting inside and outside your unit? 16. If the normal lighting failed would the occupants be able to make a safe exit? (Consider back up lighting) 17. Do you have an adequate number of fire extinguishers/fire blankets available in prominent positions and easily available for use? 18. Has the fire-fighting equipment been tested within the last 12 months? 19. Have your staff been instructed on how to operate fire-fighting equipment? 19. Have your staff been made aware of what to do should an incident occur, how to raise the alarm, evacuate and the exit locations? 20. Have you aware that petrol generators are not permitted on site? 10. Ves No 11. Yes No 12. Have you identified all ignition sources and ensured that they are kept away from combustible materials? 23. Have you identified combustible materials that could promote fire spread beyond the point of ignition such as paper/cardboard, bottled LPG, etc. and reduced the risk of them being involved in an incident?	8.	Are the cylinders located away from entrances, emergency exits and circulation areas?	Yes	No
sources of ignition? 11. Is a member of staff appropriately trained in the safe use of LPG present in the unit at all times? 12. Are the structure, roofing, walls and fittings of your stall or unit flame retardant? (Certificates may be required) 13. Where necessary, are there sufficient directional signs indicating the appropriate escape route and do they comply with current regulations? 14. Are the exits maintained available, unobstructed, and unlocked at all times the unit is in use. 15. If you intend to trade during the hours of darkness, do you have sufficient lighting inside and outside your unit? 16. If the normal lighting failed would the occupants be able to make a safe exit? (Consider back up lighting) 17. Do you have an adequate number of fire extinguishers/fire blankets available in prominent positions and easily available for use? 18. Has the fire-fighting equipment been tested within the last 12 months? 19. Have your staff been made aware of what to do should an incident occur, how to raise the alarm, evacuate and the exit locations? 20. Have you aware that petrol generators are not permitted on site? 21. Are you aware that petrol generators are not permitted on site? 22. Have you identified all ignition sources and ensured that they are kept away from combustible materials? 23. Have you identified combustible materials that could promote fire spread beyond the point of ignition such as paper/cardboard, bottled LPG, etc. and reduced the risk of them being involved in an incident?	9.	appliance when the apparatus is not in use and appliances are fitted with full flame safety	Yes	No
11. Is a member of staff appropriately trained in the safe use of LPG present in the unit at all times? 12. Are the structure, roofing, walls and fittings of your stall or unit flame retardant?
